

THE ULTIMATE OXYGEN SUPPLEMENT

DELIVERING RESULTS AND ENERGIZING CELLS

All natural/Hypo-allergenic – no harmful chemicals

pH balanced – Safe for topical applications

Non-toxic – no hydrogen peroxide or chlorine used in production

Convenient & easy to use

Help the body use vitamins, minerals and other nutrients more completely

Enhance your body's immune system

Increase powerful bactericide, vitality & fungicide in the body

Improve energy, endurance, vitality & alertness

Libra International offers an oxygen supplement that aids in replenishing a body's oxygen supply.

The current Libra International line includes Oxyplus™ an oxygen-based product designed to promote better health and stamina by increasing cellular oxygen.

THE INCREASING STRESS AND PACE OF MODERN LIFE DEPLETES OXYGEN IN THE BODY – OXYPLUS™ PUTS IT BACK. INFLUENCES THAT DECREASE OXYGEN LEVELS INCLUDE:

- * Improper diet
- * Quick and shallow breathing patterns
- * A technological and automated lifestyle that limits our physical activity
- * A sedentary indoor lifestyle creates an environment that lacks an appropriate oxygen supply
- * Increased environmental pollution and reduction of a "green plant" life decreases the level of atmospheric oxygen.

OXYPLUS™ ENHANCES THE BODY'S NUTRIENT ABSORPTION OF CAPABILITIES

The chemical source of energy products in the body is adenosine triphosphate (ATP). Oxygen is essential to the production of ATP, which shields our bodies from disease and premature aging, while enhancing vitality. Oxyplus™ has completed several studies that conclude that Oxyplus™ oxygen supplement increases tissue oxygenation and improve aerobic oxidation, resulting in better use of nutrients.

OXYPLUS™ PROPRIETARY DELIVERY SYSTEM AND FORMULA

Its unique, proprietary formula bonds oxygen in a natural solution of distilled water. The highly concentrated oxygen is released into the bloodstream where it is distributed throughout the body.

**Nourish cells *Enhance alertness *Increase energy & stamina *Boost energy *Recharge alertness *Aid breathing at high altitudes *Maximize energy *Maximize endurance *Maximize aerobic power*
