In fact, many people will lose inches before they lose weight.

Sleep 'n Slim does not require calorie counting, restricted diet, or excessive exercise. However, we do recommend that you eat healthy foods, drink plenty of water & engage in moderate exercise for maximum results & overall good health.

You should be willing to commit 3 to 6 months to see results & experience the wellness benefits of Sleep 'n Slim.

*"I first took Sleep 'n Slim at the end of June 2000. I noticed the results in the first month. Not only did I see results with my weight, but noticed a huge improvement in my skin and I found I could sleep much better. In the first month I lost one stone in weight, two inches from under my bust, two inches from my waist and one inch from my hips. I will continue to take Sleep 'n Slim even when I reach my target weight. It really works. It worked for me, it will work for you!" – Margaret, Dublin.*
